DETAILED ACTION

The amendment submitted 11/21/08 has been entered. Claims 44-45 are pending.

Allowability of claims 44-45 is withdrawn in view of the rejection set forth below.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 44-45 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-2 of U.S. Patent No. 7,332,575. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are directed to overlapping peptides.

SEQ ID NOS: 31 and 33 of the '575 patent are identical to SEQ ID NOS: 27 and 29 of the instant application. The claims in the '575 patent are directed to polypeptides comprising SEQ ID NOS: 31 and 33. The claims in the instant application are directed to polypeptides

comprising fragments of SEQ ID NOS: 27 and 29. The full length proteins would anticipate polypeptides comprising these fragments. Both sets of claims are directed to salmon GDF-8.

Applicant is again requested to identify any other co-pending applications directed to the same subject matter as the instant application.
